WORK EXPERIENCE

DIGITAL MARKETING EXECUTIVE | Freelance | Kanpur

- Executed digital marketing strategies to promote retail products and services as a self-managed freelancer – (Jul 2020 – Oct 2020)
-

PROJECTS

- **IoT-based Smart Parking System:** Developed a real-time parking management system in a duo project, focusing on integrating hardware and software components. Utilized Infrared sensors and a microcontroller to detect and report on parking slot availability.
- **To-Do List App:** Developed a functional To-Do list application in Python, implementing core features such as adding, editing, and deleting tasks with data persistence to save user progress.
- **Responsive Event Registration Form:** Designed and implemented a responsive registration form for college-level competitions using HTML, CSS, and JavaScript.
- **Password Generator:** Built a password generator tool with Python to create strong, secure passwords for users.
- **Calculator:** Engineered a functional calculator application that performs basic arithmetic operations.
